### **DETAILED ACTION**

Claims 1-34 are pending and have been examined.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 19 February 2004 has been considered by the examiner.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19-34 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Independent claims 19 and 27 encompass "computer-usable mediums" (Specification: page 3, line 3). As such computer-usable mediums include non-statutory electromagnetic signals, the claims are rejected. The dependent claims do not correct the problem. Appropriate correction required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-4; 12-13 and 16; 19 and 21-22; 27 and 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by **Cheng** et al. (USPN 6,151,643).

Claim 1

**Cheng** discloses a method of transforming (*column 2, lines 62-65*) an application, said method comprising:

assessing readiness for transformation, based on a plurality of desirable application s attributes (*column 7, lines 54-57*);

mapping at least some of said desirable application attributes to at least some kinds of help (*column 7, lines 62-64*);

generating a proposal for transformation, based on results of said assessing and said mapping; and outputting said proposal (*column 7, lines 62-64*).

Claim 3

**Cheng** discloses the method of Claim 1, wherein said assessing and said mapping may be performed for a plurality of transformation stages (*figure 2*).

Claim 4

**Cheng** discloses the method of Claim 1, wherein said assessing readiness for transformation further comprises:

providing assessment questions associated with said desirable application attributes; and receiving input in response to said questions; wherein said questions are designed to draw attention to transformation issues (*figures 4 and 10*).

*Claims 12-13 and 16*

The limitations of claims 12-13 and 16 correspond to claims 1 and 3-4 and as such are rejected in a corresponding manner.

*Claims 19 and 21-22*

The limitations of claims 19 and 21-22 correspond to claims 1 and 3-4 and as such are rejected in a corresponding manner.

*Claims 27 and 29-30*

The limitations of claims 27 and 29-30 correspond to claims 1 and 3-4 and as such are rejected in a corresponding manner.

***Allowable Subject Matter***

Claims 2 and 5-11; 14-15 and 17-18; 20 and 23-26; 28 and 31-34 are objected to as being dependent upon a rejected base claim, but would be

Art Unit: 2193

allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
